

Editors' letter

Dear Readers,

Back in the olden times of the 1980's and before mobile phones were popular with the masses we had Citizens Band Radio. Along with a my peers at the time I was one of those who conversed with friends and strangers over the radio waves. There wa a lot of codes and slang terminolgy like "10-4 good buddy", people had nicknames or "handles" and I remember Burwell was given the somewhat derogatory name of "Power City". This long nostalgic pre-amble brings me to the the shocking revelation that we are possibly going to be even more "powered up" with the proposed plan of a 40Megawatt standby gas powered generator on the new industrial estate planned for Reach Road. As a resident of Reach Road I am concerned of the impact this will have both on the environment and the noise pollution. The Parish Council seem to be in favour of this industrialisation so close to our village and the new housing development just being built on Reach Road. Please see more details on page 22 and look out for further meetings, if you want to register your dissapproval. No doubt by the time you read this, things will have hopefully moved on.

I hope you like the lovely cover picture by Kevin Pigney. Some of you will have seen his wildlife photography at local events and an insite into his work is on page 12.

Now Autumn is here it's time to catch up with some box sets. See Eve Newman's recommendations on page 32.

Until next time...

Vaughan Allanson
